

Secvest Wireless Outdoor Sounder

Art.-Nr. FUSG50000

-
- Loud combination sounder
 - Integrated spirit level for quick installation
 - Sturdy housing
-

Reliable alarm sounding

This professional sounder is the most important component of a completely wireless alarm chain. The wireless outdoor sounder with flashing LED is a combination sounder. If an alarm is triggered, the sounders generate a very loud signal tone with 105 dB of sound pressure. The sounder alarm duration can be set to 3 or 15 minutes. In addition to the acoustic warning, a visual alarm by way of a red LED (flashing frequency 1 Hz) is also triggered. The LED can be positioned above or below the sounder. The flashing light and sounder can be configured separately, meaning the light can be set to continue flashing once the signal tone ends after a defined time. Sounders and Secvest communicate with each other at 868.6625 MHz, a wireless frequency that is specially reserved for the security industry. A cover and seal contact protect the wireless outdoor sounder from tampering. In the event of tampering, the wireless outdoor sounder automatically triggers or forwards the tampering message to the Secvest alarm panel.

Secvest Wireless Outdoor Sounder

Art.-Nr. FUSG50000

Technical Data

Battery type	Alkaline battery pack 2 x 3 V (FU2986) or lithium battery pack 1 x 7.2 V (FU2985)
Certifications	INCERT, VSÖ, F&P, NCP
DC voltage supply	6-7,2V
Environmental class	IV
Flashing frequency	1Hz
Height	300mm
Housing material	Polycarbonate
Illuminant	Flashing LED bar (can be fitted at top or bottom)
Installation location	Outdoors
Length	60mm
Luminous color	Red
Max. battery life	2year(s)
Max. humidity	93%
Max. operating temperature	60°C
Max. receiving range (building)	30m

Max. receiving range (outdoors)	100m
Max. sending range (building)	30m
Max. sending range (outdoors)	100m
Min. operating temperature	-25°C
Modulation	FM
Net weight	1.2kg
Radio frequency	868
Sound pressure	105dB
Tamper monitoring	Yes
Transmission power	10
Voltage monitoring	Yes
Width	210mm
